

Write in the method headers according to the code presented below.

```
public class Program1 {
    public static void main (String [] args){
        int x = doThis(3.5);
        doThat(x);
        Program2 p2 = new Program2();
        p2.goHere(x, "frog");
        double y = p2.goThere();
    }
    public static _____ (__double_____) {
        //work
    }
    public static _____ (__int _____){
        //work
    }
}
public class Program2 {
    public _____(){
        //work
    }
    public _____void_____ (_____){
        //work
    }
    public _____ (_____){
        //work
    }
}
```

Questions when you finish:

Which methods will have the keyword "return" in them, as a final part to the work in the method?

Are variables local or global?
